The United States Coast Guard Navigation Information Service (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website <http://www.navcen.uscg.gov/gps/status/default.htm>. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: webmaster@smtp.navcen.uscg.mil, or on the internet at: <http://www.navcen.uscg.gov>.

INTERNET DELIVERY OF LOCAL NOTICE TO MARINERS

To improve service and reduce costs, the U.S. Coast Guard is moving to issuance of the Local Notices to Mariners (LNM) exclusively via the Internet. Recently, we revised our Aids to Navigation (AtoN) Manual (COMDINST M15500.7) to authorize elimination of printed LNM. Effective April 1, 2004, the U.S. Coast Guard will no longer print and mail copies of each LNM. A Notice concerning implementation of Internet delivery of LNM will be published in the Federal Register on March 2, 2004. The notice can be accessed at <http://www.gpoaccess.gov/fr/index.html>.

The Electronic versions of LNM appear on the U.S. Coast Guard Navigation Center's Website.
<http://www.navcen.uscg.gov/lnm/default.htm>.

For many years, each U.S. Coast Guard District has printed and mailed LNM free of charge to any mariner requesting a subscription. LNM provide important safety information; however, the cost of printing and mailing has become prohibitive. Technology now allows us to provide LNM in a timelier and less costly manner via the Internet. All individuals are encouraged to register for List Server notification on the Navigation Center's Website, so when LNM are posted for the district(s) in which you are interested, you will receive automatic notification of their availability.

Internet delivery of the LNM is part of a much larger U.S. Coast Guard effort to integrate, improve, and streamline the collection and dissemination of all navigation safety information.

NOAA PRINT-ON-DEMAND NAUTICAL CHARTS AVAILABLE AT REMOTE PRINT SITES.

Mariners have at their disposal a new means to obtain an up-to-date chart. Selected Print-on-Demand chart agents have the capability to print charts, on site, from the latest NOAA digital files. In future, the expectation is to have remote print sites located throughout the United States. Utilizing this remote print capability furthers the mission of providing the maritime industry with the most current information. These NOAA charts, updated by NOAA cartographers to all Notices and critical safety items known to NOAA in advance of publication in a Notice, are distributed by NOAA's partner, OceanGrafix, under the brand name, Charts-on-Demand.

For information see oceangrafix.com or nauticalcharts.noaa.gov/pod. For questions contact NOAA at help@nauticalcharts.gov

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time

- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

IV. CHART CORRECTIONS

(Explanation of Format)

Corrective action, affecting charts, is contained in this section. Chart corrections are listed numerically by chart number, beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. It is up to the mariner to decide which charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition	Edition date	Last Local Notice to Mariners	Reference datum	Source of current correction	Notice to Mariners
11534	26th ed.	12/14/91	Last LNM 41/92	NAD 83	(CDG07)	45/00
	Add		Myrtle Grove Sound to Fear River to Casino Creek			
			*Boguse Channel Light 1, FI G 2.5s, 16 ft, 7M	32-48-00.000N	079-15-00.000W	
	Corrective action		(Temp) indicates Temporary Correction Object of corrective action	Position		

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. (TEMP) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (m). (*) Asterisk is used to identify Private Aids

FLORIDA – ST. JOHNS RIVER – JACKSONVILLE – MAIN STREET BRIDGE: Bridge Repairs.

The Coast Guard is temporarily changing the regulations governing the operation of the Main Street Bridge, mile 24.7, Jacksonville, Florida. Under this temporary rule, the bridge need not open from 6:00 p.m. to 6:00 a.m. from March 1 to May 31, 2004. FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – HOBE SOUND BRIDGE: Notice of Proposed Rulemaking.

The Coast Guard proposes to change the operating regulations of the Hobe Sound Bridge (SR 708) across the Atlantic Intracoastal Waterway, mile 996.0 in Hobe Sound, Florida. This proposed rule would require the drawbridge to open on a 20-minute schedule from 7 a.m. to 6 p.m., daily. This proposed action would improve the movement of vehicular traffic while not unreasonably interfering with the movement of vessel traffic

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – PALM BEACH COUNTY DRAWBRIDGES: Notice of Proposed Rulemaking.

The Coast Guard proposes to change the regulations governing the operation of most of the Palm Beach County bridges across the Atlantic Intracoastal Waterway, Palm Beach County, Florida. The proposed rule would require these bridges to open twice an hour with the Boca Club, Camino Real bridge opening three times per hour. The proposed schedule is based on a test the Coast Guard held from March 2003 until June 2003. The proposed schedules would meet the reasonable needs of navigation while accommodating increased vehicular traffic throughout the county. Comments and related material must reach the Coast Guard on or before May 10, 2004.

 May 18 to May 22, 2004, the bridge will be closed from 7:00 a.m. to 1:00 p.m. and 2:00 p.m. to 6:00 p.m.
 May 24 to May 29, 2004, from 7:00 a.m. to 5:00 p.m., the bridge will only open at 7:00 a.m., 8:30 a.m., 10:00 a.m., 11:30 a.m., 1:00 p.m., 2:30 p.m., 4:00 p.m. and 5:00 p.m.

The horizontal channel clearance will be reduced to 45 feet at the Royal Park Bridge (SR 704/Okeechobee Boulevard), Atlantic Intracoastal Waterway mile 1022.6 at West Palm Beach, Palm Beach County, Florida. The Marine Safety Office has authorized the restriction from October 20, 2003 to April 20, 2004 for the installation of the east/west bascule leaf installation. The completion of each leaf will take approximately three months, during this time the leaf will have to remain in the down position, thus limiting the horizontal clearance of the channel to 45 feet. The Captain of the Port for the safety of all vessels is placing a maximum beam of 35 feet restriction on all vessels transiting through the bridge while one leaf is in the down position. During this construction phase there will be temporary channel closures. Mariners are advised to stay alert and to read future Local Notice to Mariners and listen for future Broadcast Notice to Mariners for information concerning these closures and restrictions. Mariners can contact the construction tug operators via VHF-FM channels 16/13 for further assistance.

SOUTH CAROLINA – SEACOAST – LITTLE RIVER INLET TO WINYAH BAY – MYRTLE BEACH: Underwater Research Project:

The University of South Carolina has Deployed two surface high-flyer buoys that will remain in place until 15 May 2004. The buoys were deployed to mark the location of bottom mounted oceanographic equipment, (Acoustic Doppler Current Profilers, ADCP), used for measuring ocean currents and directional waves, in conjunction with the U.S. Geological Survey.

The locations and description of the buoys are as follows:

Site 5: 33-44-07.200N 078-45-25.380W, High-Flyer with Radar Reflector, Carmanah Light Model 501 (amber with flash code 147).

Site 8: 33-43-02.700N 078-46-18.960W, High-Flyer with Radar Reflector, Carmanah Light Model 501 (amber with flash code 147).

The two buoys are identical, the bullet shaped floats of the high-flyer at the water surface are orange in color. The poles of the high-flyer is made of 2" diameter aluminum pipe that extends 6 feet above the water and 6 feet below. Each high-flyer is attached to an A-3 orange polyform buoy via a 10m long surface line with a 5" float in the middle (between polyform and high-flyer). For additional information contact Dr. George Voulgaris, (803) 777-2549, University of South Carolina, Department of Geological Sciences, Columbia, SC 29208,
